

VELMANOKAR S

Python Full Stack Developer | 4+ Years | FastAPI • Django • React.js • AWS • REST APIs | Immediate Joiners
9488481522 | velmanokar3@gmail.com | Chennai, Tamil Nadu

PROFESSIONAL SUMMARY

Results-oriented Python Full Stack Developer with 4+ years of experience in designing, developing, deploying, and maintaining enterprise-grade web applications using Python, FastAPI, Django, Django REST Framework, React.js, PostgreSQL, and AWS cloud services. Strong expertise in backend architecture, REST API development, frontend integration, database optimization, cloud-native deployments, and application modernization initiatives. Experienced in delivering secure Banking and Healthcare solutions with a focus on scalability, performance, reliability, and maintainability. Skilled in asynchronous processing using Celery and Redis, implementing CI/CD pipelines, integrating third-party services, managing production deployments, and supporting applications throughout the Software Development Life Cycle (SDLC). Adept at collaborating with cross-functional teams in Agile environments to deliver business-critical software solutions.

TECHNICAL SKILLS

Backend Development: Python, FastAPI, Django, Django REST Framework (DRF), RESTful APIs, Backend Architecture, Middleware Development

Frontend Development: React.js, JavaScript, HTML5, CSS3, Bootstrap, Responsive Web Applications, Component-Based Development

Database Management: PostgreSQL, MySQL, Database Design, Query Optimization, ORM, Indexing, Data Modeling

API Development & Integration: REST APIs, Third-Party Integrations, Webhooks, JSON Processing, API Documentation

Authentication & Security: JWT Authentication, Role-Based Access Control (RBAC), Secure API Development, Session Management

Asynchronous Processing: Celery, Redis, Background Task Processing, Queue Management, Scheduler Services

Cloud & DevOps: AWS EC2, AWS S3, Docker, Git, GitHub, CI/CD Pipelines, Linux

Testing & Debugging: Pytest, Unit Testing, Integration Testing, Postman, Logging, Debugging

Software Engineering Practices: Agile Scrum, SDLC, Code Reviews, Version Control, Performance Optimization, Production Support

PROFESSIONAL EXPERIENCE

Software Engineer

Hover Technologies Pvt Ltd, Pune (Remote) | May 2022 – Present

Roles & Responsibilities

- Developed enterprise-grade web applications using Python, Django, FastAPI, and React.js for Banking and Healthcare domains.
 - Designed scalable REST APIs supporting customer-facing applications, internal business operations, and third-party integrations.
 - Built reusable React.js components and integrated frontend modules with backend services to deliver responsive user experiences.
 - Implemented JWT authentication and Role-Based Access Control (RBAC) to secure sensitive business, customer data.
 - Developed asynchronous workflows using Celery, Redis for notifications, scheduled jobs, and background processing.
 - Optimized PostgreSQL and MySQL databases through indexing, query tuning, schema enhancements, and performance analysis.
 - Integrated external APIs, payment gateways, notification services, and business applications.
 - Managed source code using Git and participated in branching, merging, code reviews, release management activities.
 - Supported Docker-based deployments and AWS-hosted environments for scalable production applications.
 - Participated in sprint planning, backlog grooming, daily standups, sprint reviews, and Agile ceremonies.
 - Performed debugging, root cause analysis, and production issue resolution to maintain application stability.
 - Collaborated with QA teams to support testing activities, defect resolution, and successful software releases.
-

KEY PROJECTS

Digital Banking Operations & Loan Management Platform | Client: FinEdge Banking Solutions Pvt Ltd

Project Overview

Developed a comprehensive digital banking platform enabling financial institutions to manage customer onboarding, loan processing, account management, repayment tracking, transaction monitoring, and regulatory compliance through a centralized application ecosystem.

Responsibilities

- Developed FastAPI backend services for customer onboarding, loan management, repayment tracking, and account operations.
- Designed REST APIs supporting account service, transaction processing, reporting, customer management workflows.
- Built secure authentication and authorization modules using JWT authentication and role-based access control.
- Developed React.js dashboards for loan processing, customer management, repayment monitoring, operational analytics.
- Implemented Celery and Redis to automate payment reminders, notification services, and workflow processing.
- Optimized PostgreSQL database performance through indexing strategies, query optimization, schema refinement.
- Integrated third-party KYC verification systems and external banking service providers.
- Developed audit logging and transaction tracking modules to support compliance and monitoring requirements.
- Containerized applications using Docker and deployed services within AWS cloud environments.
- Participated in API testing, debugging, release management, and production support activities.
- Collaborated with business teams to understand banking workflows, convert requirements into technical solutions.
- Supported performance monitoring and issue resolution to maintain application reliability.

Technologies Used

Python, FastAPI, React.js, PostgreSQL, Celery, Redis, Docker, AWS EC2, AWS S3, JWT Authentication, REST APIs

Healthcare Resource & Patient Care Management Platform | Client: MediCare Digital Health Solutions Pvt Ltd

Project Overview

Developed a centralized healthcare management platform enabling hospitals and healthcare providers to manage patient records, doctor scheduling, appointment workflows, consultation tracking, laboratory services, medical reporting, and healthcare operations.

Responsibilities

- Developed backend modules for patient registration, appointment scheduling, doctor management, and consultation workflows.
- Designed REST APIs supporting patient records, healthcare services, laboratory operations, reporting functionalities.
- Built React.js dashboards for healthcare administrators, doctors, and operational teams.
- Implemented Celery and Redis for appointment reminders, automated notifications, report generation, and background processing.
- Developed secure authentication and authorization modules using JWT and role-based access controls.
- Optimized PostgreSQL database performance to improve reporting efficiency and healthcare data retrieval.
- Integrated healthcare reporting and document management functionalities within the platform.
- Participated in API testing, system validation, and end-to-end integration activities.
- Containerized applications using Docker and deployed scalable services on AWS cloud infrastructure.
- Supported monitoring, debugging, troubleshooting, and production issue resolution.
- Collaborated with stakeholders to understand healthcare workflows and implement business requirements.
- Assisted in feature enhancements, application maintenance, and performance optimization initiatives.

Technologies Used

Python, Django, FastAPI, React.js, PostgreSQL, Redis, Celery, Docker, AWS EC2, AWS S3, REST APIs, JWT Authentication

EDUCATION

Bachelor of Engineering (B.E) – Electrical and Electronics Engineering

Theni Kammavar Sangam College of Technology, Theni

2015 – 2019 | Percentage: 60%
